

PINNACLE STAIRLIFTS

CONQUER YOUR STAIRS

BE INDEPENDENT.
BE CONFIDENT. BE INFORMED.

Roughly 28% of adults 65+ report at least one fall annually.

79% of injuries from falls happen in the home.

Over one million stairway falls occur each year in the U.S.

It’s a common misconception that using the stairs is a great source of exercise. Yes, it’s true for some, but when it becomes a struggle to use the steps, they can do far more harm than good. According to the World Health Organization, about 3.4 billion people world wide are living with a neurological condition. Additionally, surveys show that nearly 1.3 million hip and knee replacements are performed annually in the States - and that figure has been trending upward. No matter the cause of difficulty when using the stairs, you are not alone. Stop the stress, take back your independence, and enjoy your home again with the help of a stairlift.

WHY HARMAR’S PINNACLE STAIRLIFTS?

While there are so many other stairlifts to consider, Harmar’s Pinnacle Straight Stairlifts are excellent choices for inside the home. Why?

Takes up Less Space

Everyone can use the stairs – stairlifts mount closely to your wall to allow ample room for others to use the staircase. Harmar’s flagship model the Pinnacle SL600 boasts a 10.5" minimum folding width, currently leading the industry.

Smooth and Stable Rides

When mobility challenges make navigating stairs difficult, a smooth, stable ride can provide greater comfort and confidence. Harmar’s straight and curved stairlifts are designed to provide a smooth, quiet ride between floors, helping users safely and comfortably access more of their homes. Pinnacle stairlifts offer a reliable indoor solution for supporting greater mobility and independence at home.

Minimize Landing Obstructions

Clear landings and walkways can help make the home safer and easier to navigate for people with limited mobility. Harmar’s optional automatic mechanical folding rail lifts and lowers as the stairlift leaves or approaches the bottom landing, helping keep the area clear for doors and walkways. At the upper landing, Pinnacle stairlifts can be configured with Zero-Overrun to help prevent the rail from extending into a walkway or doorway.

Low Maintenance

No lubrication or grease needed for gear rack operation! Harmar’s stairlifts operate with a patented low-friction nylon polymer worm gear, eliminating maintenance calls and no stains on your floors, carpets, or walls.

PERKS AS A PINNACLE OWNER

- 1. No Maintenance, No Mess
- 2. Compact but Mighty
- 3. Up to 60 Trips During a Power Outage

With weight-bearing capacities ranging from 300 lb to 600 lb, Pinnacle Straight Stairlifts are designed to give you the lift you need to enjoy your home. In the event of a power outage, these units can run up to 60 cycles so you can continue to confidently travel from floor to floor.

“My mother has mobility issues, especially with going up and down the stairs, but she really loves the stairlift that Harmar put in for us... I couldn’t be happier with it. Before having the Harmar stairlift put in, I used to walk down the stairs in front of my mother in case she fell, then behind my mother going back up the stairs. Now with the stairlift, we don’t have that issue.”

Other Pinnacle perks include standard features such as:

Safety Obstruction Sensors

Manual Swivel Seats for Safer Exits

Wide Footrest*

Seatbelt**

*Wider footrests vary slightly in style per Pinnacle model. See model details for more information.

**Seatbelts are standard on each Pinnacle; SSL-SL600 includes a standard retractable seatbelt.

AUTOMATIC FOLDING RAIL

Harmer’s SL300 and SL600 Pinnacle Straight Stairlifts can be paired with an optional automatic folding rail, designed to help people with mobility challenges maintain safe, independent access while keeping the lower landing clear. The rail automatically folds and unfolds as the stairlift moves, eliminating the need for the user to manually operate the rail or rely on someone else for assistance.

- ➔ Automatic deployment while stairlift remains in motion with no extra buttons to press
- ➔ Charging strips above and below the hinge provide flexibility for charging location
- ➔ Adjustable rubber feet to protect floors
- ➔ Mechanical, no extra motors or electronics for enhanced reliability

A PINNACLE PEACE OF MIND

Your home should be your safe space – a place of peace, silence, and comfort – you don’t have to worry about sacrificing any of that when choosing a Harmar stairlift. How do we ensure you have a continuous, quiet, and smooth trip up and down your stairs?

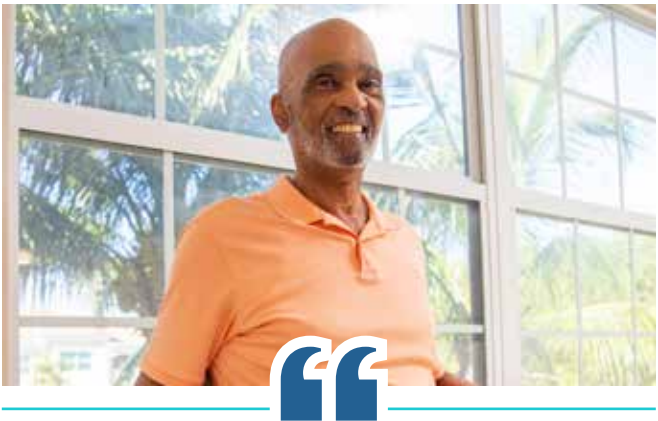

Low friction polymer worm gear with six points of contact result in an energy-efficient and smooth ride.

Nylon polymer gear rack with aluminum reinforcement means your lift doesn’t need any lubricant to run. So, you can keep going with less maintenance and no stains!

Calling all PINNACLES!

All Harmar Pinnacle Straight Stairlifts come with two call/send remote controls so you can operate your chair without needing to sit on it – this is a fantastic, convenient feature, especially for households with two stairlift users.

“I needed a lift to get up and down from my bedroom. I figured if I was going to get a stairlift, I should get the best available. I’m glad I did! I love the larger seat back and padded armrests.”

The SL600 is complete with an adjustable seat height, padded armrests, retractable seat belt, a status indicator LED light in the armrest, and limited lifetime warranty. But don’t forget the additional options to make it your own: key lock, automatic folding rail, and additional track over 16’.

MEET THE PINNACLE FAMILY

Pinnacle SL600 Flagship Model!

Designed for people with mobility challenges, the Pinnacle SL600 provides a safe, comfortable way to navigate stairs and maintain greater independence at home. With a lifting capacity of up to 350 lb, our flagship straight stairlift provides a smooth, reliable ride and greater confidence when traveling between floors. With a compact folded width of just 10½ in., the SL600 also leaves plenty of room for guests and other household members to use the stairs when the lift is not in use.

- Lifting Capacity:** 350 lb
- Seat Backrest:** 16 ¾" x 17 ⅛"
- Seat Bottom:** 18" x 14 ¾"
- Folded Width:** 10 ½" from wall
13 ⅝" with folding rail
- Track Length:** 15' 6" to 70'

MEET THE PINNACLE FAMILY

Pinnacle SL300

If a simpler stairlift solution sounds more like it, consider the SL300. This model is designed to get you where you need to be without all the bells and whistles included with the SL600.

Want to modify it to make it yours?

The SL300 is compatible with the following upgrades and options: retractable seat belt, automatic folding rail, chassis obstruction sensor, key lock, extra rail and brackets, and manual lowering tool.

- Lifting Capacity:** 300 lb
- Seat Backrest:** 15 5/16" x 9"
- Seat Bottom:** 16 1/2" x 15"
- Folded Width:** 11" from wall
13 5/8" with folding rail
- Track Length:** 15' 6" to 36'

"I'm a simple person, so I figured get a simple lift. It does what I need it to do and I couldn't love it more. I can help my wife with laundry now. So, she loves it, too."

"I was always hesitant to get a stairlift because I thought they are for old people. Now that I have the SL300, my legs feel better and I feel a bit younger again."

"Until we learned about the HD, I really thought I would have to make my dad move out of his home - he couldn't climb the stairs to get to his bed and due to his weight, most lifts couldn't accommodate him. We love this lift because he can now get to his bed - and finally can stop sleeping in the living room."

MEET THE PINNACLE FAMILY

Pinnacle SL600HD

A little extra support can go a long way. Harmar offers the SL600HD, the highest weight-bearing capacity in the industry. Capable of transporting up to 600 lb, the heavy-duty lift is designed with a high-backed and padded seat to ensure a comfortable ride.

To accompany the plush seat, the SL600HD was manufactured to offer extra support with stationary armrests, an extra-wide seat, and reinforced seat support.

- Lifting Capacity:** 600 lb
- Seat Backrest:** 16 1/2" x 17 1/2"
- Seat Bottom:** 18 3/4" x 14"
- Folded Width:** 16 1/2" from wall
- Track Length:** 15' 6" to 40'

Based in Sarasota, FL, Harmar is a leading manufacturer of stairlifts, vertical platform lifts, and wheelchair and scooter lifts for automobiles. Inspired by those with limited physical mobility, we are driven to create mobility and accessibility products that allow people to go where they want, when they want, and how they want.

Founded in 1998, we continue our mission of innovation to increase independence and improve the quality of life for millions of people who are mobility-challenged. We constantly strive to evolve and update our product lines to accommodate our growing clientele.

When mobility challenges make going up or down stairs difficult, uncomfortable, or unsafe, a stairlift can help you continue accessing every floor of your home. Designed for people who have difficulty navigating stairs, stairlifts provide a safe, comfortable way to travel between floors while seated, reducing the physical demands of stair climbing and supporting greater independence at home.

Harmar offers a variety of stairlift solutions designed to meet different mobility needs, staircase configurations, and home environments. From straight to curved staircases and indoor to outdoor applications, Harmar stairlifts help people with limited mobility safely and confidently access more of their homes.

THE HARMAR DIFFERENCE

We believe in supporting you on your journey. Our products are proudly designed and assembled here in the U.S. to help you and your loved ones enjoy freedom, independence, and dignity.

First-rate Customer Service and Support

We stand behind our products to ensure your safety and happiness with your lift. Harmar offers the best support in the industry with our LiftSquad service network, training, and support.

Safety & Testing

All of Harmar's products are subject to intense testing by subjecting the product to several times its rated load, plus life-cycle testing at or above industry standards. We take pride in knowing that our products exceed quality expectations and are more than ready to lift your life in multiple ways.

Comprehensive Dealer & Service Network

Harmar has thousands of dealer locations across North America, which helps make our products available when and where you need them. To ensure you're choosing the best lift possible for your needs, our dealers provide assessment services, installation, and routine maintenance and service. Most of our dealers are LiftSquad-certified, meaning they are factory-trained on our products, undergo routine background checks, promise to train you and caregivers on the installed product, and provide the utmost respect to you and your property. They go above and beyond to give you the best service possible.
