

PINNACLE SL600 STRAIGHT STAIRLIFT

HARMAR'S MOST COMPACT STAIRLIFT

A STEP ABOVE

Designed to help people with mobility challenges safely and independently navigate their stairs, the Pinnacle SL600 combines thoughtful design, reliable performance, and everyday comfort. Its slim profile and smooth operation provide dependable access between floors while helping users maintain greater mobility and independence at home.

What makes Pinnacle different? It's what you don't see. The patented helical worm gear and reinforced nylon polymer gear rack provide a smooth, reliable ride while eliminating the need for track lubrication. The efficient drive system also uses less energy, helping reduce operating costs.

- Just 10 ½" wide when folded
- Ergonomic control switch
- No lubrication required
- Retractable seat belt

CLEAR WALKWAYS

For people with mobility challenges, keeping stairs and landing areas clear can help make moving throughout the home safer and easier. Harmar's optional automatic and mechanical folding rail removes obstructions and potential trip hazards from the lower landing area when the stairlift is not in use. Its automatic operation means the user does not need to stop or rely on someone else for assistance, supporting greater independence when using the stairlift. And because the system is mechanical, there are no additional switches or controls to operate.

PREMIUM PERFORMANCE YOU DESERVE

I couldn't be happier with the Pinnacle. I'm so glad I made this choice for my home. I feel safe going up and down the stairs again, and it's never in the way for my grandkids!
